ST SERIES

Designd for commercial producers of varius sizes

German quality and innovative solutions

Take your harvest to the next level with GREEN PRO machines and new solution that we can offer.

OUR MISSION is to create machines that will make it faster, easier and improve the quality of industrial cannabis and hemp processing.

We produce quality bucker and trimmer machines specialized in processing industrial cannabis and hemp.

Clients can use our reputable machines for processing dry and wet materials. We develop various machines to cater to the needs of an extensive range of growers of all sizes. Our **German quality and innovative solutions** will enable you to achieve exceptional processing results.

We have the ST and VA product lines

Perfect combination to upgrade your production on next level

Feed conveyer T10 ST

A constant feed of trimmer will increase the speed of trimming capacity. With GREEN PRO conveyer you are one step closer to automatization your trimming process. Belt is FDA compliant.

QC conveyer T10 ST

With this QC conveyor, you have easier control of trimming. This will increase the quality of the final product. It is long enough to accommodate two people if needed. Belt is FDA compliant.

Capacity up to 60 kg/h ; 132lbs/h wet state of plant

ST SERIES

TRIMMER T10 ST

Our trimmers are designed and built to meet all UL, GMP, RoHS, and CE requirements. It's efficiently constructed, making it easy to clean, and has additional accessories that one can add quickly.

- The blades can be easily replaced by new spare parts
- Does not have knife adjusters since there is no counter knife
- The trimmer has heat-treated stainless steel with exceptional characteristics
- Trimmer is easy to clean and gets less dirty
- Same tumbler for dry and wet flower
- Provides the flower more access to blades

BUCKER B10 ST

At **GREEN PRO**, we use one of the best pieces of equipment to obtain the best results and incredible output on the market. Clients can rely on our **GREEN PRO** Buckler machines to get the best results while performing various tasks or activities. Our German quality machines are built with the best components to ensure that you obtain quality work and perfect results.

The **BUCKER B10 ST** is a high-quality machine developed to reduce cleaning time and work for long periods. We use the best components or elements in the market created by credible and reliable manufacturers. Our German high-quality product machine is the new standard on the market for processing hemp and cannabis.

TRIMMER T10 ST

Designed For Fast and Easy Trimming
