VA SERIES

Stainless steel version for profesional use

German quality and innovative solutions

Take your harvest to the next level with
GREEN PRO machines
and new solution that we can offer.

OUR MISSION is to create machines that will make it faster, easier and improve the quality of industrial cannabis and hemp processing.

We produce quality bucker and trimmer machines specialized in processing industrial cannabis and hemp.

Clients can use our reputable machines for processing dry and wet materials. We develop various machines to cater to the needs of an extensive range of growers of all sizes. Our **German quality and innovative solutions** will enable you to achieve exceptional processing results.

We have the ST and VA product lines

**Perfect combination
to upgrade your production on next level**

Feed conveyor T10 VA

A constant feed of trimmer will increase the speed of trimming capacity. With GreenPro conveyor you are one step closer to automatization your trimming process. All parts that are in touch with plant are made of material that can come into touch with food.

QC conveyor T10 VA

With this conveyor, you have easier control of trimming. This will increase the quality of the final product. It is long enough to accommodate two people if needed. All parts that are in touch with plant are made of material that can come into touch with food.

**Capacity
up to
60 kg/h ;
132lbs/h
wet state
of plant**

VA SERIES

TRIMMER T10 VA

Our trimmers are designed and built to meet all UL, GMP, RoHS, and CE requirements. It's efficiently constructed, making it easy to clean, and has additional accessories that one can add quickly.

- Version made entirely of material that may come into contact with food
- The blades can be easily replaced by new spare parts
- Does not have knife adjusters since there is no counter knife
- The trimmer has heat-treated stainless steel with exceptional characteristics
- Trimmer is easy to clean and gets less dirty
- Same tumbler for dry and wet flower
- Provides the flower more access to blades

BUCKER B10 VA

At **GREEN PRO**, we use one of the best pieces of equipment to obtain the best results and incredible output on the market. Clients can rely on our **GREEN PRO** Buckler machines to get the best results while performing various tasks or activities. Our German quality machines are built with the best components to ensure that you obtain quality work and perfect results.

BUCKER B10VA machine has retractable rollers that comprise of a rubber that can come into contact with food. Other machine components or elements that come into contact with the plant are made from materials that have a certificate from the food industry. This means that all the outer parts of the machine are allowed to come into contact with the plant.
